PROCEEDINGS

OF THE

ROYAL SOCIETY OF LONDON

SERIES A

CONTAINING PAPERS OF A MATHEMATICAL AND PHYSICAL CHARACTER.

VOL. LXXXVI.

LONDON:

PRINTED FOR THE ROYAL SOCIETY AND SOLD BY
HARRISON AND SONS, ST. MARTIN'S LANE,
PRINTERS IN ORDINARY TO HIS MAJESTY.

JULY, 1912.

CONTENTS.

SERIES A. VOL. LXXXVI.

No. A 583.—December 22, 1911.

PAGE

Optical Dispersion: A Comparison of the Maxima of Absorption and Selective Reflection for Certain Substances. By T. H. Havelock, M.A., D.Sc., Armstrong College, Newcastle-on-Tyne. Communicated by Prof. Sir J. Larmor, Sec. R.S. 1

The Influence of the Solvent on the Position of Absorption Bands in Solutions. By T. H. Havelock, M.A., D.Sc., Armstrong College, Newcastle-on-Tyne. Communicated by Sir Joseph Larmor, Sec. R.S. 15

On the Resistance to the Motion of a Thread of Mercury in a Glass Tube. By Gilbert D. West, B.Sc., East London College, University of London. Communicated by Prof. C. H. Lees, F.R.S. 20

The Adherence of Flat Surfaces. By H. M. Budgett, B.A. Communicated by R. T. Glazebrook, C.B., F.R.S. 25

On the Spectrum of Boron. By Sir William Crookes, O.M., For. Sec. R.S. (Plate 1) 36

Colour-Blindness and the Trichromatic Theory of Colour Vision. Part III.—Incomplete Colour-Blindness. By Sir W. de W. Abney, K.C.B., F.R.S. 42

A Chemically Active Modification of Nitrogen produced by the Electric Discharge.—II. By the Hon. R. J. Strutt, F.R.S., Professor of Physics, Imperial College of Science, South Kensington 56

Analysis of Tidal Records for Brisbane for the Year 1908. By F. J. Selby, M.A. Communicated by Dr. R. T. Glazebrook, F.R.S. 64

The Distillation of Binary Mixtures of Metals *in Vacuo*. Part I.—Isolation of a Compound of Magnesium and Zinc. By Arthur John Berry, B.A., Downing College, Cambridge. Communicated by C. T. Heycock, F.R.S. 67

On the Conductivity of a Gas, between Parallel Plate Electrodes, when the Current Approaches the Maximum Value. By John S. Townsend, F.R.S., Wykeham Professor of Physics, Oxford 72

On the Iron Flame Spectrum and those of Sun-spots and Lower-type Stars. By Sir Norman Lockyer, K.C.B., F.R.S. 78

No. A 584.—January 31, 1912.

Address of the President, Sir Archibald Geikie, K.C.B., at the Anniversary Meeting on November 30, 1911 81

On Sinhalese Iron and Steel of Ancient Origin. By Sir Robert Hadfield, F.R.S. (Plates 2—5) 94

PAGE

Note on the Monatomicity of Neon, Krypton, and Xenon. By Sir William Ramsay, K.C.B., F.R.S. 100

The Mechanics of the Water Molecule. By R. A. Houstoun, M.A., Ph.D., D.Sc., Lecturer in Physical Optics in the University of Glasgow. Communicated by Prof. A. Gray, F.R.S. 102

Spectroscopic Investigations in Connection with the Active Modification of Nitrogen. II.—Spectra of Elements and Compounds excited by the Nitrogen. By the Hon. R. J. Strutt, M.A., F.R.S., Professor of Physics, and A. Fowler, F.R.S., Assistant Professor of Physics, Imperial College of Science and Technology, South Kensington. (Plate 6) 105

The Less Refrangible Spectrum of Cyanogen, and its Occurrence in the Carbon Arc. By A. Fowler, A.R.C.S., F.R.S., Assistant Professor of Physics, and H. Shaw, A.R.C.S., F.R.A.S., Demonstrator of Astrophysics, Imperial College of Science and Technology, South Kensington. (Plate 7) 118

A High-Speed Fatigue-Tester, and the Endurance of Metals under Alternating Stresses of High Frequency. By Bertram Hopkinson, F.R.S. 131

The Mechanism of the Semi-permeable Membrane and a New Method of Determining Osmotic Pressure. By Prof. F. T. Trouton, F.R.S. 149

Mobility of the Positive and Negative Ions in Gases at High Pressures. By Alois F. Kovarik, Ph.D., John Harling Research Fellow in Physics, The Victoria University of Manchester. Communicated by Prof. E. Rutherford, F.R.S. 154

No. A 585.—February 20, 1912.

On the Viscosities of Gaseous Chlorine and Bromine. By A. O. Rankine, D.Sc., Assistant in the Department of Physics, University College, London. Communicated by Prof. F. T. Trouton, F.R.S. 162

On the Relation between Current, Voltage, Pressure, and the Length of the Dark Space in Different Gases. By F. W. Aston, B.Sc., Trinity College, Cambridge, and H. E. Watson, B.Sc., 1851 Exhibition Scholar, Trinity College, Cambridge. Communicated by Sir J. J. Thomson, F.R.S. 168

A New Method of Determining the Radiation Constant. By G. A. Shakespear, M.A., B.Sc. Communicated by Prof. J. H. Poynting, F.R.S. 180

Obituary Notices of Fellows Deceased :—

Sir William Huggins, O.M., K.C.B. (with portrait) ; George Johnstone Stoney (with portrait) ..... i—xxxv

No. A 586.—February 28, 1912.

Determination of the Coefficient of Inter-Diffusion of Gases and the Velocity of Ions under an Electric Force, in Terms of Mean Free Paths. By John S. Townsend, F.R.S., Wykeham Professor of Physics, Oxford 197

On the Propagation of Waves through a Stratified Medium, with Special Reference to the Question of Reflection. By Lord Rayleigh, O.M., F.R.S. 207

PAGE

The Testing of Plane Surfaces. By P. E. Shaw, B.A., D.Sc. Communicated by Prof. J. H. Poynting, F.R.S. 227

Note on the Scattering of α-Particles. By Dr. H. Geiger, Lecturer in Physics, Manchester University. Communicated by Prof. E. Rutherford, F.R.S. 235

The Effect of Temperature upon Radioactive Disintegration. By Alexander S. Russell, M.A., B.Sc., Carnegie Research Fellow of the University of Glasgow. Communicated by Prof. E. Rutherford, F.R.S. 240

Obituary Notices of Fellows Deceased :—

Giovanni Virginio Schiaparelli ; Jacobus Henricus van't Hoff ; John Attfield ; Nevil Story-Maskelyne..... xxxvii—lv

No. A 587.—March 26, 1912.

Bakerian Lecture.—On the Variation of the Specific Heat of Water, with Experiments by a New Method. By H. L. Callendar, M.A., LL.D., F.R.S., Professor of Physics at the Imperial College of Science, S.W. (Abstract) 254

The Spectrum of Comet Brooks (1911 c). By Sir Norman Lockyer, K.C.B., F.R.S. (Plate 8) 258

A Chemically Active Modification of Nitrogen, Produced by the Electric Discharge. —III. By the Hon. R. J. Strutt, F.R.S., Professor of Physics, Imperial College of Science, South Kensington 262

The Atomic Weight of Radium. By Robert Whytlaw-Gray and Sir William Ramsay, K.C.B., F.R.S. 270

An Optical Determination of the Variation of Stress in a Thin Rectangular Plate Subjected to Shear. By E. G. Coker, M.A., D.Sc., Professor of Mechanical Engineering in the City and Guilds of London Technical College, Finsbury. Communicated by Prof. Karl Pearson, F.R.S..... 291

Spectroscopic Observations: Lithium and Cæsium. By P. V. Bevan, Sc.D., Royal Holloway College. Communicated by Sir J. J. Thomson, F.R.S. (Plate 9) ... 320

The So-called Thermoid Effect and the Question of Superheating of a Platinum-Silver Resistance Used in Continuous-flow Calorimetry. By Howard T. Barnes, D.Sc., F.R.S., Macdonald Professor of Physics, McGill University, Montreal ... 330

No. A 588.—April 25, 1912.

The Observation by Means of a String Electrometer of Fluctuations in the Ionisation Produced by γ-Rays. By T. H. Laby, B.A., Professor of Physics, Wellington, N.Z., and P. W. Burbidge, B.Sc., Senior University Scholar, N.Z. Communicated by Sir Joseph Larmor, Sec. R.S. 333

On the Velocities of Ions in Dried Gases. By Robert Tabor Lattey, M.A., Trinity College, Oxford, and Henry Thomas Tizard, M.A., Fellow of Oriel College, Oxford. Communicated by Prof. J. S. Townsend, F.R.S..... 349

Short Index to Reports of Physical Observations (Electric, Magnetic, Meteorological, Seismological) made at Kew Observatory. Communicated by Dr. C. Chree, F.R.S., by request of the Gassiot Committee 358

PAGE

The Transmission of Cathode Rays through Matter. By R. Whiddington, M.A., Fellow of St. John's College, Cambridge. Communicated by Sir J. J. Thomson, F.R.S. 360

The Velocity of the Secondary Cathode Particles Ejected by the Characteristic Röntgen Rays. By R. Whiddington, M.A., Fellow of St. John's College, Cambridge. Communicated by Sir J. J. Thomson, F.R.S. 370

The Emission of Electricity from Carbon at High Temperatures. By J. A. Harker, D.Sc., F.R.S., and G. W. C. Kaye, B.A., D.Sc. 379

The Wave-Problem of Cauchy and Poisson for Finite Depth and slightly Compressible Fluid. By F. B. Pidduck, M.A., Fellow of Queen's College, Oxford. Communicated by Prof. A. E. H. Love, F.R.S. 396

On the Devitrification of Silica Glass. By Sir William Crookes, O.M., For. Sec. R.S. 406

Experimental Work on a New Standard of Light. By W. A. Harwood and J. E. Petavel, F.R.S. 409

The Kinetic Theory of a Gas Constituted of Spherically Symmetrical Molecules. By S. Chapman, M.Sc., Chief Assistant, Royal Observatory, Greenwich. (Abstract.) Communicated by Sir J. Larmor, Sec. R.S. 411

No. A 589.—May 8, 1912.

A Critical Study of Spectral Series. Part II.—The p and s Sequences and the Atomic Volume Term. By W. M. Hicks, Sc.D., F.R.S. (Abstract) 413

An Optical Load-extension Indicator, together with some Diagrams Obtained therewith. By Prof. W. E. Dalby, City and Guilds Engineering College. Communicated by Sir J. A. Ewing, K.C.B., F.R.S. 414

The Passage of Homogeneous Röntgen-Rays through Gases. By E. A. Owen, B.Sc., 1851 Exhibition Scholar of the University College of North Wales, Trinity College, Cambridge. Communicated by Prof. Sir J. J. Thomson, F.R.S. 426

Fluorescent Röntgen Radiation from Elements of High Atomic Weight. By J. Crosby Chapman, B.Sc., Layton Research Scholar of the University of London, King's College; Research Student of Gonville and Caius College, Cambridge. Communicated by Prof. Sir J. J. Thomson, F.R.S. 439

On the Variation of the Resistance of Selenium with the Voltage. By E. E. Fournier d'Albe, B.Sc., A.R.C.S., Assistant Lecturer in Physics in the University of Birmingham. Communicated by Prof. J. H. Poynting, F.R.S. 452

The Volatility of Metals of the Platinum Group. By Sir William Crookes, O.M., For. Sec. R.S. 461

the Distribution of the Scattered Röntgen Radiation. By J. A. Crowther, M.A., Fellow of St. John's College, Cambridge. Communicated by Prof. Sir J. J. Thomson, F.R.S. 478

PAGE

No. A 590.—June 27, 1912.

Contributions to the Study of Flicker.—Paper III. By T. C. Porter, M.A., D.Sc. Communicated by Lord Rayleigh, O.M., F.R.S. 495

The Nature of the γ-Rays excited by β-Rays. By J. A. Gray, B.Sc., 1851 Exhibition Scholar, University of Melbourne; Hon. Research Fellow, University of Manchester. Communicated by Prof. E. Rutherford, F.R.S. 513

The After-luminosity of Electric Discharge in Hydrogen, observed by Hertz. By the Hon. R. J. Strutt, F.R.S., Professor of Physics, Imperial College of Science, South Kensington 529

On the Changes in the Dimensions of a Steel Wire when Twisted, and on the Pressure of Distortional Waves in Steel. By J. H. Poynting, F.R.S., Mason Professor of Physics in the University of Birmingham 534

On the Self-Induction of Electric Currents in a Thin Anchor-Ring. By Lord Rayleigh, O.M., F.R.S. 562

The Diffusion and Mobility of Ions in a Magnetic Field. By John S. Townsend, F.R.S., Wykeham Professor of Physics, Oxford 571

A New Treatment of Optical Aberration. By R. A. Sampson, F.R.S. (Abstract.) 577

No. A 591.—July 20, 1912.

The Critical Constants and Orthobaric Densities of Xenon. By Hubert Sutton Patterson, B.Sc., Richard Stafford Cripps and Robert Whytlaw-Gray. Communicated by Sir W. Ramsay, K.C.B., F.R.S. 579

On the Observed Variations in the Temperature Coefficients of a Precision Balance. By J. J. Manley, Hon. M.A. Oxon., Daubeny Curator, Magdalen College, Oxford. Communicated by Prof. E. B. Elliott, F.R.S. 591

The General Theory of Colloidal Solutions. By W. B. Hardy, F.R.S. 601

The Tension of Composite Fluid Surfaces and the Mechanical Stability of Films of Fluid. By W. B. Hardy, F.R.S. 610

OBITUARY NOTICES OF FELLOWS DECEASED.

Sir William Huggins, O.M., K.C.B.; George Johnstone Stoney; Giovanni Virginio Schiaparelli; Jacobus Henricus van't Hoff; John Attfield; Nevil Story-Maskelyne ..... i—lv
